Provide independent reading practice for every learner with Read & Think

Independent reading practice is critical for developing independent readers. Read & Think enables and empowers every reader to read proficiently as an independent reader and enabling the reader to process information, connect, correlate and develop a deeper understanding of the text.
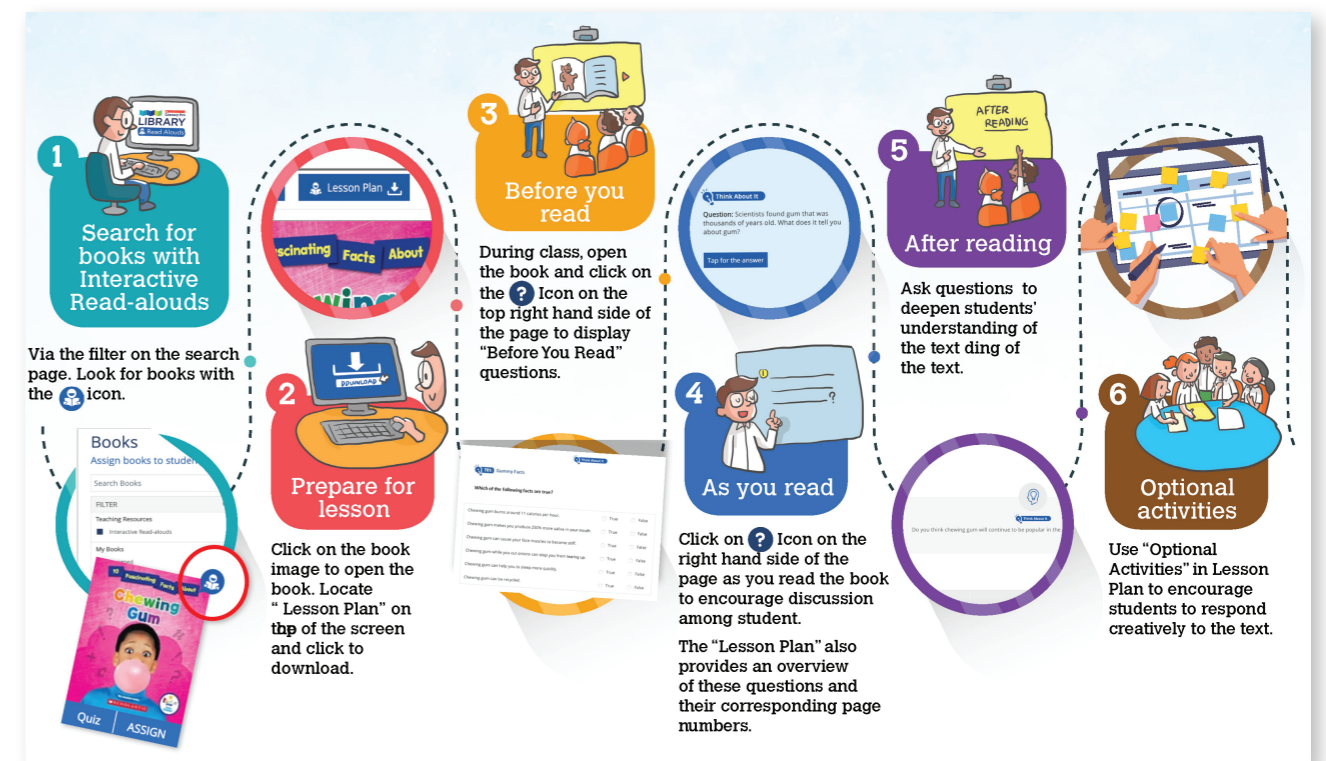

Prompts at strategic points within the text enable the reader to process information independently.

## Increase engagement and comprehension with Interactive Read-Alouds

Research shows that reading aloud to children is the most important activity for eventual reading success. The Interactive Read-Alouds feature provides teachers with rich resources for an engaging and interactive read-aloud experience with minimal preparation:

- 150 specially selected fiction and nonfiction ebooks across 10 themes, covering a range of Lexiles that focus on elementary school level.
- lesson plans and downloadable worksheets for each book
